Transparency & Awareness for a sustainable future

Sustainability is a key part of our corporate culture and shapes our actions throughout the entire supply chain. We take responsibility for environmentally conscious and socially responsible sourcing and promote sustainable production processes among our suppliers. At Kroschu, we don't just identify sustainability trends — we embrace them fully and integrate them into our business strategies. The automotive industry is evolving rapidly, and we are committed to staying ahead by actively responding to the latest innovations that promote a greener future.

What we expect from a successful partnership with our suppliers

- ✓ **Commitment to Social Responsibility:** We expect our suppliers to uphold ethical standards throughout their supply chains, ensuring fair working conditions and respect for human rights in all business practices.
- ✓ **Sustainable Material Sourcing:** Suppliers should prioritize materials that are environmentally friendly and resource-efficient, considering factors such as carbon footprint, raw material origin, and the use of recycled content.
- ✓ **Climate and Environmental Protection in Production:** We value partners who actively implement energy-efficient and sustainable production methods, aiming to reduce environmental impact through responsible manufacturing practices.
- ✓ **Sustainability Compliance and Transparency:** All suppliers must undergo a sustainability assessment to ensure compliance with our environmental and social standards, including ISO 14001 certification for environmental management.

Driving success with effective collaboration interfaces

Use of Specialized Tools for Sustainability and Supplier Collaboration

To support our commitment to sustainability and effective collaboration with our suppliers, we utilize dedicated tools and software platforms designed for seamless communication, information exchange, and data collection. These systems enable us to efficiently gather essential information from our suppliers and partners, ensuring transparency and accountability throughout the supply chain.

Regarding Supply Chain Risk & Compliance, we use established solutions that are applied as needed across specific topics. Suppliers are invited via time-limited links to provide relevant information.

! We expect all our suppliers to respond promptly, comprehensively, and accurately through these platforms. By actively sharing relevant data and updates, our suppliers help us meet the stringent requirements of our customers as well as uphold environmental and sustainability standards.
